Instructions for Completing Annual Declaration

No Activity	If there has been No Activity for the reporting period, check this box.									
Harvested Timber	Enter the total area and volume harvested. Volumes may come from the Ministry of Forests Scale Volume Statement. If the volume is not scaled and the timber does not leave the property, the volume reported may be estimated. Owners do not need to report Harvested Timber when the volume is less than 20 cubic metres, is not removed from the property, and does not result in the creation of an opening \geq 1 hectare.									
	Additionally for selective harvesting, identify if the selective harvest area remains stocked in accordance with the Council Regulation Section 31. Enter the area of selective harvest that remains stocked.									
Destroyed Timber	Enter the area \geq 1 hectare destroyed. Provide the cause, such as bark beetle, other insect attack, root disease, fire, blowdown. Note: destroyed areas one hectare or greater must be reforested.									
Road Construction	Enter the total length of new roads constructed. Include older roads that have been upgraded or reconstructed. Include in-block roads.									
Road Deactivation	Enter the length of road that has been either permanently deactivated or deconstructed. Refer to Council Regulation for deactivation definition.									
Reforestation	Enter the area of openings reforested during the year. Note: all openings one hectare or greater must be restocked within 5 years and successfully regenerated within 10 years. Restocking and successful regeneration must be reported within the 5 and 10 year reforestation periods. Minimum stocking level is 400 well distributed crop trees per hectare on the coast, and 600 well distributed crop trees per hectare in the interior. Refer to Council Regulation Section 31 for complete reforestation requirements. A listing of blocks is required if more than one block is declared restocked or successfully regenerated - see Block Listing Guidance below.									
	Reminder: if you harvested in or before 2012, these areas are now required to be restocked and a declaration of restocking must be made if you have not done so previously. Contact our office if you are not sure if you are up to date on reporting.									
	Note: If an area is harvested or destroyed prior to becoming your MF, the area is required to be restocked within 10 years and successfully regenerated within 20 years. The reforestation must be reported within the 10 and 20 year time periods.									
Maps	Maps are REQUIRED as indicated on page 1 of the form.									
Block Listings	A listing of blocks is required for owners who have harvested, restocked, or successfully regenerated more than one block during the year .									
	Listing for harvested blocks must include block ID and hectares, for example:	<table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="width: 100px;">Block ID</th> <th style="width: 100px;">hectares</th> </tr> </thead> <tbody> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> </tbody> </table>	Block ID	hectares						
	Block ID	hectares								
Listing for restocked or successfully regenerated blocks must include block ID, year harvested and hectares, for example:	<table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="width: 100px;">Block ID</th> <th style="width: 100px;">Year harvested</th> <th style="width: 100px;">hectares</th> </tr> </thead> <tbody> <tr> <td> </td> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> <td> </td> </tr> </tbody> </table>	Block ID	Year harvested	hectares
